EchoScreen

Privacy is precious. Today's open-plan offices, schools, and living quarters can result in visual and acoustic distraction. EchoScreens, made of sound-absorbing EchoPanel, help reduce sonic and visual over-stimulation for healthy, productive spaces. EchoScreen room dividers, which can be mounted to the ceiling or walls, are a great modular solution for visual and acoustic space division in today's open environments and can be mounted on the wall or ceiling.

NRC (SOUND ABSORPTION RATING): ASTM C423-90A

While all EchoPanel products offer varying degrees of sound absorption, not all have been tested for NRC using the ASTM standard test method for sound absorption.

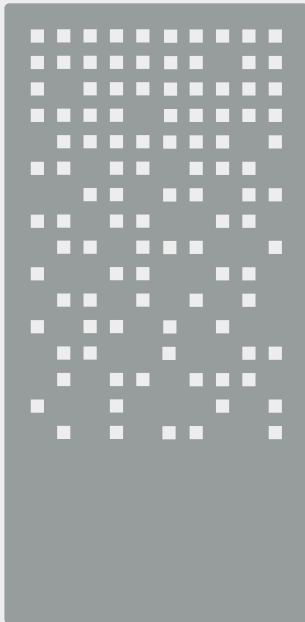

Fire Rating

ASTM E84 Class C (Class A treatment available on 7mm and 12mm panels only)

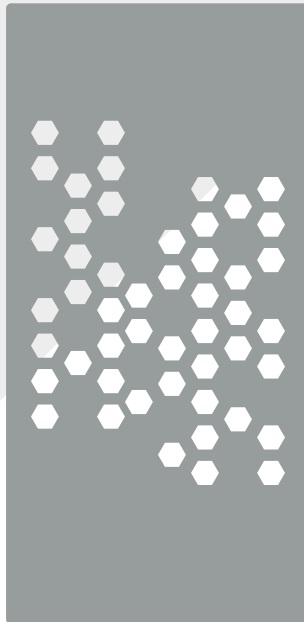

VOC Emissions

ASTM D5116 <0.07mg/m²/hr. (7 Days)

Hardware & Installation

EchoScreens can be hung from ceilings or walls using standard hardware or custom installation. Download the EchoScreen Installation Guide on the website for detailed information.

EchoScreen with Channel Track

Ceiling

Each standard EchoScreen includes our proprietary channel track, plus two attachment hardware sets. Hanging options include 1/4"-20 set screw and eyebolt fasteners to enable hanging with cable, rod and other premium hanging hardware.

Visit our website and download the EchoScreen Installation Guide to see additional hardware capabilities.

Wall

EchoScreens may be mounted on walls or glass using standoffs, adhesive or even suction cups.
