

Wall Panel Systems + EchoPanel FAQ

What is EchoPanel®?

EchoPanel is a decorative acoustic panel with a felt-like face finish. It is manufactured from 100% PET (up to 60% post-consumer recycled content) and may be recycled after use. EchoPanel is a low-emitting material that passes CDPH certification for LEED and other green building programs, with low VOC emissions. Using EchoPanel helps reduce echo and noise levels within enclosed spaces such as offices and classrooms.

What is Wall Panel Systems (WPS)?

Wall Panel Systems (WPS) provides a kit of panel mounting hardware to enable easy and attractive wall and ceiling panel application. WPS systems enable uniform mounting of panels with a variety of reveals between panels.

How do EchoPanel and WPS systems work together?

EchoPanel acoustic panels are compatible with WPS mounting systems, enabling clean, sleek designs for walls and ceilings with enhanced acoustic control.

What seam reveal options are available with WPS?

EchoPanel is compatible with varying reveal styles including Shadowline, Universal Architectural, Open Reveal, and Recessed Reveal. Please check with a WPS representative regarding additional reveal options.

What are the different trim finish options that are available?

The trim finish options available include Clear Satin Anodized, Bronze Anodized, Black Anodized, and Powder Coated.

What is the maximum panel size for a WPS + EchoPanel system?

Maximum individual panel size is 47.24" x 110.24" x .47" (1200mm x 2800mm x 12mm). Panels may be arranged to cover nearly any size wall or ceiling surface.

What is the NRC of WPS + EchoPanel?

The NRC of EchoPanel ranges from .35-.75 depending on installation. Standard EchoPanel NRC acoustic data is available for acoustic calculations. Please contact Kirei for this test data.

Wall Panel Systems + EchoPanel FAQ

What can I design with WPS + EchoPanel?

The WPS + EchoPanel system enables a wide variety of designs from simple squares to geometric shapes limited only by your design ideas and panel size. You can see WPS + EchoPanel design ideas at www.wallpanelsystems.net.

Where can WPS + EchoPanel be used?

WPS + EchoPanel is an acoustic solution for commercial, hospitality, restaurant, education, residential and entertainment spaces. It can be used for wall covering, ceiling panels, and other surfaces where acoustic performance is desired.

How is WPS + EchoPanel installed?

WPS + EchoPanel is installed by professional installers using a kit of parts and precut panels provided by WPS. Please refer to the WPS website (wallpanelsystems.net) for installation guides and videos.

How is WPS + EchoPanel sold?

WPS + EchoPanel is purchased as a complete kit including precut EchoPanel panels and the required hardware kit, ready for installation. The complete set of panels and hardware is purchased directly from WPS.
