Product Care

AKUART is made with a form-stable stretched fabric which does not wrinkle or fold when mounted on the frame. The canvas is easily cleanable with bleach and can be machine washed at high temperatures (194 F), making it an ideal solution for pathogen concerns and healthcare environments. AKUART's unique design makes it possible to quickly and easily detach and replace the canvas, providing the option to change and update the print.

Installation

Shelter Me is attached to the desk top with adjustable clamp mounts that allow for the right tilt. This tilting capability ensures that the screen is always vertically leveled, even with any irregularities on the floor surface, and allows for several desk screens to align perfectly when placed continuously besides each other.
