Simple Baffle: Classic acoustic ceiling design for modern spaces

The Simple Baffle ceiling system helps create visual lightness while diffusing sound where spaces need it most. Use simple or complex forms for spaces that delight and perform. The clean, minimalist design with individual baffles enables varied ceiling looks even in complicated spaces with HVAC, sprinklers, and lighting to contend with. Four standard lengths and the option to customize blade profile and length make it easy to specify this scalable, repeatable system whether you need 10 or 10,000 baffles to make your space just right.

NRC (SOUND ABSORPTION RATING): ASTM C423-90A

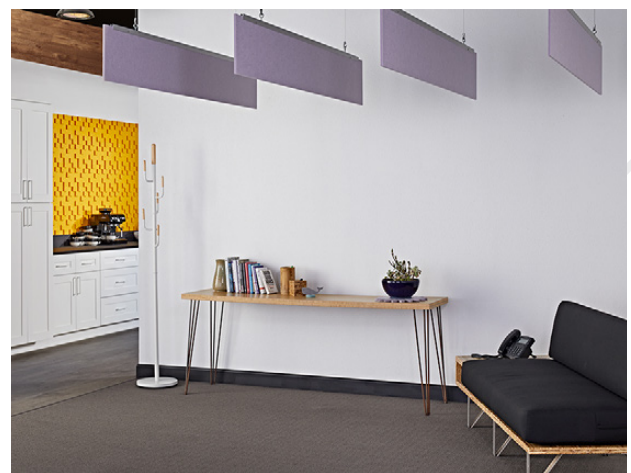

Standard EchoPanel® NRC acoustic data is available for acoustic calculations. Please contact Kirei for this test data.

Hardware & Installation

Hanging Hardware

Simple Baffles are ceiling hung at any height via direct mount, cables or rods. Each Simple Baffle includes our proprietary adjustable Baf Track, plus eyebolt or 1/4-20 mounting screw hardware compatible with aircraft cable, Unistrut or other hanging systems. For complex spaces where fewer mounting points are necessary we recommend the EchoSky rack system.

Add-On Hardware

For ACT grid ceilings, Simple Baffles can be mounted with T-Grid Clips and magnets, available for an additional charge.
